Messenger USB USB ON HOLD Messaging System

- The Messenger® USB is a state-of-the-art digital audio playback device designed to play your message continuously-via a production stored and playing directly off a USB thumbdrive
- Messages are stored on industry standard 16MB and larger USB flash drives. providing high quality
- Audio content is easily managed by plugging the USB flash drive into a PC or MAC computer's USB port and "dragging and dropping" MP3 files to and from the drive.
- We update your message-on-hold or background music programs via e-mail or ftp and then all you do is drop and drag the production to the thumb drive from your computer
- Then plug the flash drive into the messenger and the unit updates automatically and begins playing your on hold production immediately
- That means almost instantaneous production changes to react to your ever changing on hold needs

Each Messenger USB is built to exacting quality standards using state-of-the-art assembly equipment for outstanding reliability and years of dependable service.-
