## RUF Download REMOTE ON HOLD Messaging System

### Remote

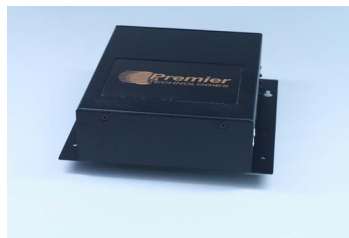

We update your message-on-hold or background music programs volume level and setting of security remotely from a touch-tone telephone. No more having to go into your telephone room.

### Fast Changes

Hands free...which means almost instantaneous production changes to react to your ever changing on hold needs. After we have received your final approved script we can produce and load your new production within 24 hours.

### Installation

We can assist your telephone installer with some simple tips for installation. Once installed, you will never have to go back in to that dusty equipment room again. Your callers on hold will hear a clear 64 kbps sampling assuring the highest quality playback of your on-hold message.

The remote series is suggested for telephone on-hold applications where friendliness, high sound quality and durability are needed. Ideal for multiple location installations. Music and Messages are downloaded remotely over the phone line; manually or computer controlled

Proudly made in the  
USA
