RUF Download REMOTE ON HOLD Messaging System

Remote

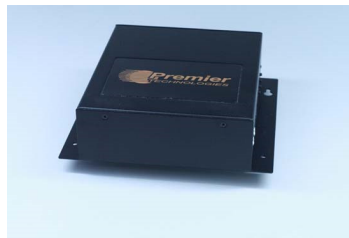

We update your message-on-hold or background music programs volume level and setting of security remotely from a touch-tone telephone. No more having to go into your telephone room.

Fast Changes

Hands free...which means almost instantaneous production changes to react to your ever changing on hold needs. After we have received your final approved script we can produce and load your new production within 24 hours.

Crystal-Clear Sound

64 kbps sampling assures the highest quality playback of your on-hold message.

The remote series is suggested for telephone on-hold applications where friendliness, high sound quality and durability are needed. Ideal for multiple location installations. Music and Messages are downloaded remotely over the phone line; manually or computer controlled
